EXECUTIVE PDF

BifrostConnect

Short executive version

AI platforms see you too rarely in the searches that matter.

The biggest lift comes from answering your buyers' most important questions more clearly and making you easier to trust.

AI MARKET POSITION

52/100

Combined index for AI visibility, breadth, technical health, and credibility.

AI VISIBILITY NOW

51/100

How often you are chosen or shown in the tested AI searches.

COVERAGE ACROSS PLATFORMS

44%

How broadly you are visible across ChatGPT, Claude, Gemini, and Google AI.

POTENTIAL IMPACT

+46%

Our best estimate of the lift if the most important actions are carried out.

WHAT WE WOULD START WITH

Strengthen the pages that need to win the searches

This is the fastest path from loose visibility to being chosen more often when someone is close to buying.

WHY IT MATTERS NOW

5 important searches end completely without you.

4 profiles or trust signals create an unclear picture.

WHAT IT CAN MOVE

+46%

Our best estimate of how much more relevant demand the plan can create.

PRIORITIZATION

What to do first

Three recommendations, sorted by how clearly the data points to them and how quickly they can create movement.

1

Effort Medium | Good signal

Strengthen the pages that need to win the searches

This is the fastest path from loose visibility to being chosen more often when someone is close to buying.

Start with 2-3 updates to your most important pages or strongest sections that match the searches where you are currently missing entirely or only visible as a source, and make it clear who you help, what you solve, and how an engagement starts.

MAINLY BASED ON

- best secure remote access solution for industrial equipment
- zero trust remote access for OT
- industrial remote access without VPN

IN PRACTICE

- Strengthen the most relevant existing page or add a short FAQ, case, or service section that answers the query "best secure remote access solution for industrial equipment" directly with a clear explanation, concrete examples, and a clear next step.
- Strengthen an explanatory page or section for the query "zero trust remote access for OT" and make it clear how your solution is built, which principles it follows, and when it matters in practice.
- Strengthen the most relevant existing page or add a short FAQ, case, or service section that answers the query "how to access offline industrial equipment remotely" directly with a clear explanation, concrete examples, and a clear next step.

MOST LIKELY
+28%

RANGE
17-42%

SCOPE
3 updates to core pages or sections

2

Effort Small | Good signal

Make your credibility clearer on Google and LinkedIn

When your online footprint is unclear, you become harder to trust and harder to choose.

Make your most important profiles consistent and complete so buyers and AI answers meet the same clear picture of you across Google, LinkedIn, and the rest of your online footprint.

MAINLY BASED ON

Google Business | Linkedin | Instagram

IN PRACTICE

- Create and complete a Google Business Profile with company name, category, address, phone number, and website link.
- Use the same short positioning on LinkedIn as on the website: what you help with, who you help, and when people typically reach out.
- Update the Instagram bio and link so it points to a page with your core offerings instead of a generic homepage.

MOST LIKELY
+18%

RANGE
12-26%

SCOPE
1 profile + 2 copy/bio updates

3

Effort Medium | Good signal

Make your difference clearer in buying situations

When others are mentioned more often than you, your strengths need to be easier to understand without forcing the buyer to guess.

Make it clear why a buyer chooses you with a short decision section, 3 sharp differences, and a concrete example of when you are the right choice.

MAINLY BASED ON

Ixon

IN PRACTICE

- Add a section on your main service or About page with the heading "When are we the right choice?".
- Describe 3 concrete differences with short explanations: who you work closest with, how the collaboration runs, and what the buyer typically gets out of it.
- Support the difference with a mini-example or short case where your solution created clearer security, faster access, or less operational friction.

MOST LIKELY
+20%

RANGE
13-30%

SCOPE
1 decision section + 3 proof points

WHY THESE RECOMMENDATIONS

What the recommendations are based on

The key data points that explain why we recommend these first three actions.

IMPORTANT SEARCH

best secure remote access solution for industrial equipment

You are not mentioned on ChatGPT, Claude, Gemini and Google AI for this search.

Short answer: there isn't one "best" choice for every OT environment. Pick a solution that gives you zero-trust style access (least privilege, MFA, per-session approval), strong auditing/recording, works with your PLC/H...

IMPORTANT SEARCH

zero trust remote access for OT

You are not mentioned on ChatGPT, Claude, Gemini and Google AI for this search.

Here's a practical, product-agnostic blueprint for Zero Trust remote access in OT (industrial/ICS) environments. What "Zero Trust for OT" means - Never trust by network location; authenticate and authorize every user, d...

TECHNICAL ISSUE

Mobile performance

The weakest technical area scores 58/100.

When this lags, the site becomes harder to use and harder to interpret correctly.

SEARCHES

Where you lose or win demand

These are the most important searches to look at first because they explain both lost visibility and the next opportunity.

Lost | category

0%

best secure remote access solution for industrial equipment

CRITICAL GAPS

- Wikipedia: Consider creating a Wikipedia article or getting support for credible external references. This requires notability.
- Media coverage (Google News): Pursue proactive PR and press releases aimed at at least 3-5 placements in relevant trade publications over the last 12 months.
- G2: Create a free G2 profile and ask existing customers to leave reviews.

COMPETITIVE PRESSURE

3

Ixon is being chosen more often than you in the same searches.

You are mentioned in 4 searches, while Ixon is mentioned in 8. That means buyers are more often being led in their direction.

YOU RIGHT NOW

4 mentions

You are being chosen in AI answers with a combined score of 51/100 and coverage of 44%.

LEADING COMPETITOR

8 mentions

Ixon has a technical benchmark of 81/100.

WHAT IT MEANS

Next move

There is a real gap to competitors that needs to be closed with clearer pages and a sharper position.
